

IN THE DRAWINGS:

Please find attached a set of replacement sheets of drawings to address the objections the Examiner has made to the drawings. In particular, the examiner objected to the drawings for failure to comply with 37 CFR 1.84(h) and (u)(1) because FIGS. 13 and 23 comprise more than one figure that were not clearly separated from one another and not consecutively numbered and for failure to comply with 37 CFR 1.84(m) because solid black shading (FIGS. 13 and 23) was not permitted. The Examiner also objected to the drawings for failure to comply with 37 CFR 1.84 (u)(1) because the figure numbers should be followed by a capital letter, not a lower case letter and for failure to comply with 37 CFR 1.84(u)(2) because the view numbers were not larger than the numbers used for reference characters. Further, the Examiner objected to the drawings because the drawings were illegible insofar as the shading used in FIG. 23-26 for "No Foam" and "Black" were indistinguishable.

Further, FIGS. 17, 20 and 21 have been amended to correct minor discrepancies and to clarify the figures. The graphs depicted in FIGS. 17, 20, and 21 are supported by and correctly reflect the data from Table 10 on page 29 of the current application. Applicants submit that no new matter has been added.

Applicants respectfully submit that the set of replacement sheets of drawings as well as changes to the specification address the concerns of the examiner. Applicants submit that no new matter has been injected into the application by way of the changes to the drawings or the specification.
